

### GENERAL NOTES:

1. Provide insulation and finish systems to meet EIMA Specifications. Installation of insulation and finish system shall be in accordance to EIMA's **Guide to Exterior Insulation & Finish System Construction**.
2. Provide air/water barrier compatible to EIFS. Air/water barrier to be continuous from face of exterior wall over parapet, and to structural roof decking. Air/Water Barrier type and location shall be in accordance with the **NRCA Roofing and Waterproofing Manual**.
3. Check with Underwriters Laboratories for specific air/water barrier systems.
4. Face of coping shall extend a minimum of 2-1/2" below edge of EIFS.
5. Follow SFIA **Technical Guide for Cold-Formed Steel Framing Products** for specific depth, thickness, and spacing of structural studs and roof joists.
6. Consult with specialty structural engineer for structural stud and roof design.
7. Check local codes and mechanical engineer for vapor type and location.
